INTRODUCTION TO PHOTOGRAPHY

- Photography is like magic! With just a camera, we can capture memories, make art, and tell stories. Today, we're going to learn all about how cameras work and how YOU can take amazing pictures

Name _____

Date _____

WHAT IS A CAMERA?

- A camera is like a magic box that takes pictures. It has a special eye called a 'lens' that sees the world, and when you press the button, it captures what it sees and turns it into a picture.

Name _____

Date _____

WHAT IS A LENS?

- The lens is like the camera's superpower! It helps focus and zoom in on things, just like your eyes! The better the lens, the clearer and sharper the picture.

Name _____

Date _____

SHUTTER - BLINK AND YOU MISS IT!

- The shutter is the camera's 'blink.' When you press the button, the shutter opens for just a tiny moment to let light inside. It's like a quick blink that catches the picture before it closes again!

Name _____

Date _____

ISO - THE CAMERA'S SUPERPOWER IN THE DARK

- ISO helps the camera see better in the dark! When it's dark outside or inside, you can increase the ISO to make the camera extra-sensitive to light. But be careful, too much ISO can make your picture grainy!

Name _____

Date _____

DEPTH OF FIELD - FOCUS ON WHAT'S IMPORTANT

- The depth of field is how much of the photo is in focus. If you focus on one thing, like a flower, the rest of the background can get blurry. This makes your subject pop out!

Name _____

Date _____

DEPTH OF FIELD - FOCUS ON WHAT'S IMPORTANT

- The depth of field is how much of the photo is in focus. If you focus on one thing, like a flower, the rest of the background can get blurry. This makes your subject pop out!

CAMERA ANGLES - CHANGING YOUR VIEW

The depth of field is how much of the photo is in focus. If you focus on one thing, like a flower, the rest of the background can get blurry.

This makes your subject pop out!

Name _____ Date _____

ZOOM VS. PRIME LENS

- A zoom lens lets you zoom in or out, just like a telescope! A prime lens is fixed, so it doesn't zoom, but it's really sharp and perfect for clear, close-up shots.

Name _____

Date _____

FRAMING THE PICTURE - WHAT'S IN YOUR FRAME?

- When you take a photo, think about what's inside the frame. You can use the Rule of Thirds: imagine your photo is divided into three parts, and place your subject where the lines meet. It makes your photo more interesting!

Name _____ Date _____

THE RULE OF THIRDS

The Rule of Thirds helps make your picture look balanced. Imagine your photo is split into nine boxes. Try to put your subject, like the sun, at the place where the lines cross, and you'll have a photo that looks just right!

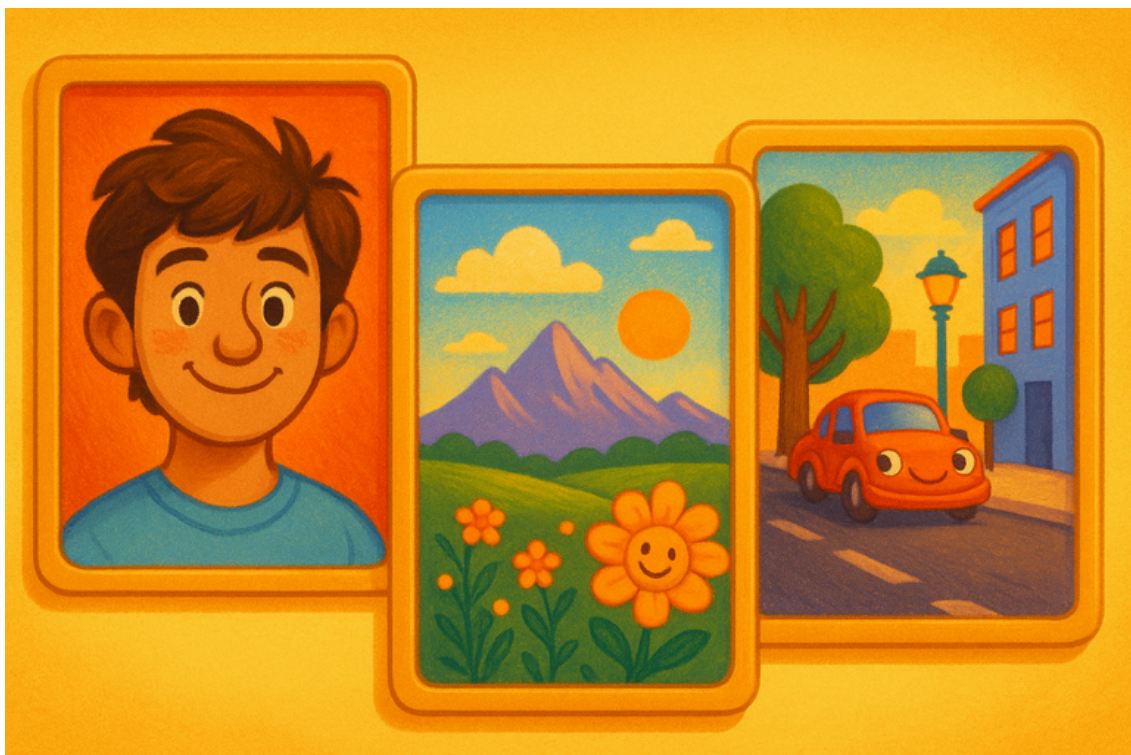

Name _____

Date _____

DIFFERENT TYPES OF PHOTOGRAPHY

There are lots of types of photography! Portrait photography captures people's faces. Landscape photography shows beautiful views of nature. And street photography captures the world around you, like fun, busy cities!

Name _____ Date _____

LET'S GO TAKE PICTURES!

Now it's your turn to take pictures! Use everything you learned today—choose the right lens, think about the angle, and have fun framing your shots. Remember, photography is about telling a story and capturing beautiful moments!

Name _____ Date _____

THE END – KEEP EXPLORING!

- Congratulations, young photographer! You're now ready to explore the world of photography. Keep experimenting, stay curious, and never stop capturing the beauty around you.
